## Professional Experience(s)

### Tech Lead Scripting Developer @ Natwest Group, Oct 2011 - Present

I am lead developer over Expansion packs for finance reporting, working on python django postgres ReactJS and REST APIs

I handle(d) Code . Collaborate . Build . Change . Incident . Release . Triage

I was a lead developer over Arria NLG platform & stability coordinator

I help(ed) recruit & grow team, train(ed) new joiners and work(ed) on capability building

I act as code reviewer, mentor and face of end-user queries to dev team

I use(d) Argon APIs for cross platform message (SOAP/JSON/files) deliveries internally

I use JIRA & Leankit for agility, bug tracking and backlog grooming

I use SNOW for Incident, Change & Release management life cycle

### Analyst Programmer @ Syntel, Apr2011 - Sep2011

### Programmer @ 9 Dimensions, Nov2009 - Mar2011

### Programmer @ DAVIM, Sep2007 - Sep2008

### Key Project Details @ Natwest Group

#### CeX / RfX, Natwest Group, Feb2021 - Current

These projects are regression projects for Risk Based Markets Economic factors and produce risk weights on risk variables. To achieve this, we hook univar and moody's analytics APIs and get data into our organisation and do regression over it. We use internal SSO, python3, django, django-rest, postgres and dash to achieve the output

#### Smart Disability Initiatives, Natwest Group, Aug2020 - Current

I have opted to be in the disability initiative and contributed by making one social network platform for disabled carers and NGOs and CII-IBDN indian government body and native app for the BDF(Business Disability Forum) group in the UK

#### Arria NLG Budgets and Forecasts Narratives, Jul2019 - Nov2020

This project was intended for automatic commentary / notes / narratives generation from bank statement reports using Arria.com NLG platform and using Tableau UI / dashboarding capabilities.

#### Finance Portal, Apr2016 - Jul2018

Across the Bank, for statutory / regulatory needs, the project uses standard and configurable reports approach to building disclosures using MVC, Python3 & Tornado, Javascript, React/Html5 and Sql & PLSql in Oracle 11g.

#### CNMS - Cash Nostro Management System, Oct2011 - Jan2015

Soap implemented, python proxy server, the aim was to have a single instance accessing RBS cash balances server and can give relevant data to authorized clients identified by IPs.

**Miscellaneous:** L3 support, non technology / reporting / migration projects

**Agile ceremonies:** planning, estimation, sprint, retrospective, review

**SDLC:** requirements gathering, analysis, design, coding, testing, deployment and support

**Other Projects:** Library Management, PRVit, MDO, iPub, few automation tools in excel

## Education

PGDITM, Symbiosis,

Pune(2017 - 63%)

B.Tech IT, MDU,

Haryana(2007 - 77%)

## Certs / Awards

PCA, Python Institute

1Z0-071 Oracle DB SQL

React+Redux, Udemy

simple ML, Rest, Flask

## Skills
